NATIONAL ANTHEM OF THE REPUBLIC
OF UZBEKISTAN

Poem by Abdulla Oripov
Translation by Ibrahim Yuksel

My country, sunny and free, salvation to your people,
You are warmhearted companion to the friends
Flourish eternally with knowledge and inventions,
May your fame shine as long as the world exists!

Refrain

These golden valleys-dear Uzbekistan,
Manly spirit of ancestors is companion to you!
When the great power of people became exuberant
You are the country that amazes the world!

Belief of generous Uzbek does not die out,
Free young children are a strong wing for you
The torch of independence, guardian of peace,
Just motherland is externally prosperous!

Refrain

These golden valleys-dear Uzbekistan,
Manly spirit of ancestors is companion to you
When the great power of people became exuberant
You are the country that amazes the world!
DECLARATION OF INDEPENDENCE OF THE REPUBLIC OF UZBEKISTAN

(Adopted by the Supreme Council on August 31, 1991)

Being full member of the International Association, the Republic of Uzbekistan takes part in the international relations as sovereign state, the object of International Law, the main goal of which is lasting peace, disarmament, demilitarization of its territory, elimination of nuclear and other weapons of mass destruction, non-use of force and pressure, and first of all military forces when settling disputes and contradictions between sovereign states, as well as cooperation with states and solidarity with peoples in solving global problems of mankind.

From now on the Republic of Uzbekistan is governed by Constitution and Laws of the republic. The Republic of Uzbekistan declares itself open for signing equal and mutually beneficial agreements and con-tracts with all the partners without any preliminary terms.

The Republic of Uzbekistan guarantees equal political rights and opportunities of social-economic and cultural development to all the peoples living in the territory of the Republic of Uzbekistan.

Striving for creation of human and democratic state which provides corresponding standard of living, protection of honor and dignity of each person living in its territory regardless of nationality, religious belief and social position; the Republic of Uzbekistan resolutely comes out against racism, chauvinism, nationalism, and against any attempts to restrict the rights of peoples. The Republic of Uzbekistan recognizes the primacy of International Law norms.

GEOGRAPHICAL POSITION OF THE REPUBLIC OF UZBEKISTAN

The Republic of Uzbekistan occupies the territory of 447.4 thousand square kilometers and is situated in Central Asia. It borders on Kirghizia in the north-east, on Kazakhstan — in the north and north-west, on Turkme-nistan — in the south-west, on Tajikistan — in the south-east. In the south it borders on Afghanistan.
The territory of the country has a general inclination from south-east to north-west. In the south-west it is washed by the Aral Sea. The relief of the surface is divided into two unequal parts. The greater north-western part is a flat country and the smaller south-eastern part — foot-hills and mountains. The plains of Uzbekistan include a greater part of the Kyzylkum desert, the plain of the Amu-Daryo River, the delta of Zerafshan and Kashkadaryo, and the southeastern part of the Usturt plateau.

On the whole, the plains are favorable for rural economy on condition that they have enough water-supply and they will be used for irrigated agriculture and pastures. Most of the territory of Uzbekistan is occupied by plains (near four fifth of the territory). One of the main is Turanian plain. In the east and northeast of country are situated spurs of Tin-Shan and the Pamirs, here is the highest spot of country (4643 m). There is one of the largest desert of the world — Kizilkums on the north of central part of the territory of Uzbekistan.

The foot-hills and mountainous parts of Uzbekistan include Tin Shan spurs and Hissar-Alai ranges. Among the ranges there are positioned the Ferghana Valley, Golodnaya Steppe, the valleys of Chirchik, Angren and Keles Rivers, the Zerafshan, Kitab-Sakhrisabs, and Surkhan Darya hollows, the axis of which are occupied by the plains of the corresponding rivers.

NAVRUZ

March 21 is the holiday of Navruz. In cities, towns and villages people of Uzbekistan celebrate Navruz, the eastern New Year, which is a holiday that celebrates the awakening of nature, and promotes friendship, fraternity and cultural and historical traditions.

March 21 is the spring equinox, meaning that day is equal to night everywhere on the planet. Our ancestors considered this day the beginning of the astronomical year. Uzbek scientists and poets of the past wrote that Navruz was celebrated long, long ago. During the Arab invasion of Central Asia, Navruz was prohibited, but after the downfall of the Arab Caliphates in the 9th and 10th centuries it was revived again.

Young and old prepare for Navruz in a flurry of spring cleaning, washing, scrubbing, painting and decorating of homes. A week before the holiday many people of Uzbekistan take part in a republic-wide khashar (voluntary, unpaid work performed collectively). In honour of the holiday, new gardens are planted and machinery for cultivation is prepared for field work. A lot of money is donated to the Navruz fund. Navruz is also a holiday of mercy and absolution. On this day people forgive one another their old offences and visit lonely and disabled, people trying to do whatever they can for those who need their care.

Families with many children and pensioners receive gifts and allowances. Navruz is also a holiday of youth, beauty and creativity. The streets, squares and parks of the towns and cities are beautifully
decorated and full of music, songs and laughter. Dozens of professional ensembles demonstrate their skills. Women cook a wide variety of delicious foods such as palov, shashlik, naryn, khasyp and manty. The choice of cakes, sweetmeats, jam and fruit is unbelievable. But the king of all these holiday dishes is sumalak, a high-calorie stew of germinated wheat, the making of which is a compulsory element in the Navruz festival.

Usually the women of the neighborhood take part in the cooking. Only the best of cooks are entrusted with the important task of making sumalak. Jokes, songs and fun accompany the process of cooking. Sumalak is boiled for more than 24 hours in big cauldrons, the bottoms of which are covered with washed river stones and nuts. According to custom, those who get a stone when the dish is served in plates or cups will be fortunate in the coming year and their dreams will come true. While the women are cooking sumalak, the men of the neighborhood are often cooking halim, another traditional dish. It is made by boiling milk, veal, sheep, wheat and flour in a cauldron. It is also boiled for 24 hours. When it's hot, it is very tasty.

ECOLOGY

The Aral Sea is one of the largest internal water non-dischargeable reservoirs in the world which was formed as the result of inflow of two large rivers of Central Asia—Amudarya and Sirdarya. In former times not less than 50—55 billion cubic metres of fresh water ran into it, that is why salt content of water was only 9—10 gm per litre. As the result, it was rich in fish including freshwater fish. Being located between two Central Asian deserts — the Karakum and the Kizilkum — it played the role of stabilizer preventing the formation of new deserts. In addition, it played definite role in land reclamation being a natural reservoir for salt transported by river and collector-drainage effluent from all irrigated land.

In recent 20—25 years as the result of intensive development of irrigated farming, industry and everyday services the inflow of river water into the Aral Sea sharply decreased; water level reduced by 14 meters, and salinity increased 3 times. The sea was divided into, two reservoirs — the big and small one — and lost its fishing and transportation value. The former bottom of the sea (about 30 thousand sq km) requires urgent measures on soil stabilizations; otherwise it becomes the object of intensive wind erosion and salt spreading.

The problem of preservation of the Aral Sea became not only the internal Central Asian problem but international, as well. UNESCO and other international organizations and charitable societies got interested in this problem. For a long time the scientists from Uzbekistan, Kazakhstan, Turkmenistan carefully study the problem. At present, a single conception is being developed. The idea is to preserve the Aral Sea or at least to decrease to the maximum the negative consequences of drying out. An important point in solving the Aral Sea problem is a development of productive forces of the region including the investment of foreign capital.

REGIONS AND DISTRICTS OF UZBEKISTAN:

THE REPUBLIC OF KARAikalpAKSTAN

The Republic of Karakalpakstan (the former Karakalpak Autonomous Republic) on January 9, 1992 adopted the status of the sovereign Republic of Karakalpakstan.

The Republic of Karakalpakstan is located on the lower reaches of the Amudarya river, occupies the North-Western part of the Kyzylkum desert, the South-Western part of the Usturt plateau and the delta of the Amudarya river. The Southern part of the Aral Sea is on the territory of the Republic.

The area of Karakalpakstan makes 38% of the territory of Uzbekistan. However, despite such an impressive territory, Karakalpakstan is one of the most thinly populated regions. There are 1543,3 thousand inhabitants here (as of January, 2002). That is the reason of low indices of population density. In this respect Karakalpakstan gives way to all regions (except the Navoi region). If, in average, there are 56,2 people per km² in Uzbekistan, then in Karakalpakstan this index includes 9,3 people which is caused by relatively unfavorable climate conditions.

The main part of the population inhabits the coastal lines of the Amudarya river, and there are less populated settlements in the desert areas. Karakalpakstan borders on Kazakhstan, Turkmenistan, the Bukhara, Khorezan and Navoi regions. The capital of Karakalpakstan is Nukus.

The Republic of Karakalpakstan includes 15 rural districts (the Amudarya, Beruni, Bozatau, Kanlikul, Karauzyak, Kegeyli, Kungrad, Muynak, Nukus, Tahtakupir, Turtkul, Khojeyli, Chimbai, Shumanay, Ellikkala districts) and 12 towns (Nukus, Beruni, Biston,

SIRDARYO REGION.

The Sirdaryo region is relatively one of the youngest regions of Uzbekistan. It appeared on the map 37 years ago - on February 16, 1963 to open up arid lands of the Hunger Steppe, to further improve economy and culture of this area.

The region is located on the left bank of the Sirdaryo river as it flows out from the Farghona valley. The Sirdaryo region borders on Kazakhstan in the North, on the Toshkent region in the East, on Tojikistan in the South and on the Jizakh region in the West. The area of the region is 4,3 thousand km . It takes next to the last place, leaves behind only the Andijon region.

The population is also the smallest one - only 660.8 thousand people. From the total number of population more than 32% live in town settlements, the others reside in rural places. There are 153.7 people per each km .

The Sirdaryo region consists of 14 rural districts (the Bayaut, Guliston, Mehnatobod, Mirzaobod, Oqoltin, Saykhunobod, Sirdaryo, Khovost, Sharof Rashidov districts) and 5 towns (Guliston, Bakht, Sirdaryo, Shirin, Yangiyer). Guliston is the central city of the region.

Toshkent

Toshkent is the capital of an independent Republic of Uzbekistan. It is a very old city. It was founded more than 2000 years ago. The city is located, at the foothills of Tin Shan mountain range lies in the Chirchiq river valley. The population of the city has already grown up to more than 2000000 people.
There are several monuments and historical buildings of Moslems such as Kokaldash madrasah and Barak-khan mosque which were built in the 16th century. Tashkent has now become the most modern city of Uzbekistan which has new avenues, squares, high buildings and fountains. The city is flourishing as never before The transport facilities are good enough: there are buses, trolley-buses, trams, taxis, underground, railways with several beautiful metro stations decorated with traditional Uzbek culture.

Toshkent is the educational and scientific centre of Uzbekistan where there are a lot of universities, institutes, schools, special secondary schools. The city has the republics academy of sciences which unites dozens of research institutes. As cultural centre there are many libraries, theatres, film studies, TV centers and cinema houses. In the field of economy its industrial establishments which produce cotton fabric, textile machinery, electrical equipment, cotton harvesters and others are well known not only CIS but in the world also.

Toshkent is often called a city of peace and friendship. For a very short period of time Tashkent became well known in the world as the capital of the new sovereign, independent state. Numbers of summit talks are held; in Tashkent. A lot of embassies and representations of many international organizations, companies and firms are opened in our city.

THE AMU DARYO AND THE SIR DARYO

The last expedition to the basin of two great rivers of our republic the Amu daryo and Syrdaryo has conducted analyses of these rivers and a number of canals. The waters from the cotton fields flows into the canals which these feed two great rivers. Because of the large amount of chemical products and other kinds of pollution the water in the rivers has made a lethal affection on their flora and fauna.

In one section of the Amu-Bukhorо canal the high humidity zone extends from one to two kilometers into the desert. On its way the canal loses half of the water, if not more. The expedition has its analysis in autumn when the water level is lowest. It is higher in summer, when the water flows faster, resulting in an even greater filtration. Swamps and lakes have just appeared that are absolutely useless to man.

All these man-made basins have raised the ground water and fertile lands become salinated. And now the lands in the cotton-growing regions are so polluted with chemicals and all kinds of fertilizers that they can yield nothing.
A large group of writers, journalists, and scientists have studied various areas of the basins of the Amu Daryo right from the glaciers in the Pamirs. They looked into the causes and consequences of the dangerous ecological situation in the Aral Sea basin. The members of the expedition have analyzed the results and came to the conclusion that this tragedy demands quick and decisive measures. The scientists of different fields are busy now with searching the ways from this situation.

OUTSTANDING PEOPLE OF UZBEKISTAN

AMIR TEMUR

In the middle of 14th century a fight for independence against Mongols empire which had begun in Khuroson reached Movarounnahr. The main reason of the fable of Mongols empire was the fight of Central Asian people for their freedom.

In this fight the great leader of his people and military leader Amir Temur made his great contribution. He spent all his life and activity to fight against evil and oppression, to finish the battles between Khans and Beks and to establish a strong centralized State. His name was known not only in Turon but all over the world.

He became famous statesman and great leader of Uzbek people. Amir Temur was born on April 9, 1336 in the village of Hojailghor near Shahrisabs. His father was authoritative rich man whose name was Amir Taraghay.

His mother - Teguna was noble woman. So he was well educated in his family. He was strong and handsome. As his father was rich man he had many servants. When he was 12 years old he began to rule over them and besides that he knew to protect the property and how to own it. In his early years he was interested in State affairs and military activities.

He spent much time to a military training and getting the secular education. When he was a fellow he took part in the wars between the various land owners. He was courageous horse-rider and he knew military affairs very well. During one of the battles his leg and hand were wounded. His hand fully recovered soon but his leg stayed being lame.

ALISHER NAVOI

Alisher Navoi is a great poet, statesman and the founder of Uzbek literature was born in Herat, on the 9th of February 1441. Soon Alisher Navoi became a very famous poet. He was active for many years in the social life of Temur's state which was torn by endless wars after the death of Temur. Alisher Navoi got a very good education for those days. He knew all poetic forms, but he liked only true poets. Navoi wrote mostly in Turkic and he used Persian very little.

Navoi was well-known as a literary scholar. He supported poets, scientists, artists. He was a great master of fine arts and knew how to handle a painter's brush himself. He was a very good architect, and designed many schools, hospitals, inns, bridges, roads and channels.

Navoj's poems in old Uzbek were collected into four parts, which were called "Char Devon". His poems in Farsi were collected and called "Devoni-Foni". His most important work is of, course the 'Quintuple", five poems written between 1483 and 1485.

The first, "Khairat-ul- Abror" is a philosophical work.
The second poem is "Farkhad and Shirin"
The third is "Layly and Majnun"
The fourth is "Seven Planet" It consists of 7 short novels around a common theme; the quarrel of kind of King Bahrom and his beloved Dilorom
The fifth is "Saddy Iskandary"

Alisher Navoi spent his last years in Herat. His last book "Mahbub - al-qulub " which was written in prose, are very popular with the Uzbek people to this day. Alisher Navoi died on the 3rd of January in 1501.

His works have entered the treasury of world literature and have been translated into many languages.
